

PILOT LADDERS

- Steps have non-skif / anti-slip surface.
- The side ropes of the pilot ladder consist of two uncovered ropes not less than 20mm in diameter on each side and should be continuous at the botton, white no joints and have a breaking strength of at least 24 KN per side rope.
- A permanent marking is provided at regular intervals (e.g. 1 meter. white black splitting distance pieces) throughout the length of the ladder consistent with ladder desing, use and maintenance in order to facilitate the rigging of the ladder to the required height.
